2. Citations and explanations

The present invention concerns a synergistic fungicidal composition containing dithianon and fenamidone or famoxadone.

D1 describes synergistic fungicidal compositions based *inter alia* on famoxadone. Dithianon is mentioned only as an alternative to famoxadone, not as a possible mixing partner.

D2 describes synergistic fungicidal compositions based on dithianon. However, it mentions neither fenamidone nor famoxadone.

Obtaining a synergistic effect by using the two claimed components is considered unforeseeable.

Therefore the present application meets the requirements of PCT Article 33(2) to (4) since, in light of the prior art as defined in the Regulations, the subject matter of claims 1 to 8 is novel (PCT Rule 64.1 to 64.3), involves an inventive step (PCT Rule 65.1, 65.2) and has industrial applicability.
